Education

ITM Skills University

Bachelor's Of Technology - Computer Science and Engineering

Aug 2025-Aug 2029

Kharghar , Navi Mumbai

Relevant Coursework

- Data Structures & Algorithms
- Object-Oriented Programming (C++)
- Web Development (HTML, CSS, JavaScript)
- React.js
- Product Development
- Software Engineering
- Building products
- Product thinking

Experience

Tag 8

Project Manager Intern (AI & Automation)

July 2026 - Aug 2026

Prabhadevi , Mumbai

- Led the planning and coordination of AI and automation initiatives by collaborating with cross-functional teams to ensure timely project execution.
- Conducted market and competitor research to identify customer needs and support product strategy discussions.
- Worked closely with engineering and business teams to define project scope, prioritize features, and monitor development progress.
- Managed project timelines, tracked milestones, and helped resolve blockers to keep deliverables on schedule.
- Participated in product discussions by translating business requirements into actionable tasks for the development team.
- Contributed to AI-powered product initiatives by improving workflows and supporting process automation.
- Collaborated with stakeholders to gather requirements, document updates, and ensure alignment with business objectives.

Dayalstreet Financial Services Pvt Ltd

Relationship Manager (RM)

May 2025 - June 2026

Vashi , Navi Mumbai

- Managed a portfolio of clients by providing day-to-day support related to stock market activities and investment services.
- Built and maintained strong client relationships through regular communication and personalized assistance.
- Analyzed market trends and shared timely insights to help clients make informed financial decisions.
- Addressed client queries, resolved issues promptly, and ensured a high level of customer satisfaction.
- Coordinated with internal teams to facilitate smooth onboarding and service delivery.
- Maintained accurate records of client interactions and followed up on action items to improve the overall customer experience.

Projects

Kechua

TypeScript, React.js, Node.js, MongoDB, Tailwind CSS

- Designed and developed an AI-powered agritech platform to help farmers identify crop diseases, access government schemes, and receive personalized agricultural guidance.
- Conducted problem analysis and translated farmer pain points into product features such as AI farm scanning, weather insights, multilingual support, and an interactive learning experience.
- Collaborated on feature planning and iterative product improvements while building a responsive, user-centric interface focused on accessibility and real-world usability.

FigSword

Godot, GDScript, JavaScript, Nakama, HTML5

- Designed and developed a browser-based multiplayer game that gamifies agricultural learning through interactive missions, encouraging users to explore farming concepts in an engaging way.
- Planned and implemented core product features including multiplayer matchmaking, real-time gameplay, responsive UI, and progression mechanics while continuously iterating based on testing and feedback.
- Collaborated on product design decisions by balancing gameplay, user experience, and educational objectives to create an engaging and accessible web-based platform.

Fuel Expense Calculator

React.js, JavaScript, Google Maps API, HTML, CSS

- Developed a web application that calculates trip expenses by estimating fuel costs based on travel distance, vehicle mileage, fuel type, and current fuel prices.
- Designed an intuitive user interface with route selection and real-time cost estimation to help users make informed travel decisions and improve trip planning.
- Integrated Google Maps API for distance calculation and optimized the application for responsiveness, usability, and accurate travel cost analysis.

Claim-Sure

HTML, CSS, JavaScript

- Developed a healthcare claim management platform during a hackathon to simplify the insurance claim process through a user-friendly digital interface.
- Collaborated with team members to identify user pain points, prioritize essential features, and deliver a functional minimum viable product (MVP) within a limited timeframe.
- Designed an intuitive workflow that streamlined claim submission, status tracking, and user interaction while focusing on accessibility and ease of use.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB

Developer Tools: Git, GitHub, VS Code, Postman, Figma, Excel

Technologies: REST APIs, Google Maps API, Godot Engine, Responsive Web Design

Core Competencies

- Product Management
- Product Research & Analysis
- Feature Planning & Prioritization
- Product Lifecycle Understanding
- Agile Methodologies
- Cross-Functional Collaboration
- Stakeholder & Client Management
- Market & Competitor Research
- Data-Driven Decision Making
- Project Planning & Coordination
- User-Centered Problem Solving
- Communication & Presentation
- Team Collaboration
- Analytical Thinking

Professional Summary

First-year B.Tech Computer Science student with hands-on experience in product development, AI automation, and customer relationship management. Built user-centric products in agritech, gaming, and web applications while collaborating across technical and business teams. Passionate about product management, solving real-world problems, and delivering data-driven solutions that enhance user experience.
